DETAILED ACTION

Applicant's amendment filed 16 November 2007 has necessitated the following restriction requirement.

Election/Restrictions

Amended claim 8 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: allowability of claim 8 was dependent upon inclusion of limitations of intermediate claims 6 and 7. Exclusion of these limitations presents a claim having a different inventive concept than that as originally filed. Additionally, upon further consideration, the examiner erred in indicating claim 17 allowable in the Office action of 16 August 2007, as the allowability of claim 17 required inclusion of the limitations of intermediate claim 16. Omission of this subject matter presents a different inventive concept than that as originally claimed.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 8, 9 and 17 are withdrawn from consideration as being directed to non-elected inventions. See 37 CFR 1.142(b) and MPEP § 821.03.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3, 5, 6, 12, 13 and 16, drawn to a crash barrier assembly.

Group II, claim 15, drawn to a crash barrier assembly.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I recites the inventive concept of a rod traversing the horizontal surface not included in Group II and Group II recites the inventive concept of material affixed along vertical surfaces not included in Group I.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
